

OFFICIAL STATEMENT: CONTINENTAL COMMITTEES

The Board of Directors has approved the appointment of the members of the new Continental Committees, becoming part of the institutional organization of the IPF. These Committees constituted based on the statutes will undoubtedly reinforce, adding value, to the development of Padel in the different projects that will be carried out on each region.

Once all the applications have been received, which have been many, and after being studied and valued, the Committees have been created made up of great professionals who will work to make our sport more solid and larger.

For the first time, women will have an important influence in the decisions of the International Federation, since in all the structures of the Continental Committees there will be at least one woman.

Historical milestones can only be achieved if we are united and working in the same direction, not only in Padel but also in sports, which shows that we are an active, modern and constantly developing International Institution.
