

SPAIN JOINS THE EUROPEAN COMMITTEE

It has been almost a month and a half after the change of the structure within the Spanish Padel Federation and the new direction of the institution, in the country with the biggest number of players, is beginning to be remarkable.

After the appointment of the new Presidency and Board, the Spanish Padel Federation has shown its interest in the work for the development of Padel together with the official and most important institutions of our sport.

Therefore, we would like to congratulate **José Pérez García**, Vice-President of the Spanish Padel Federation, for his new integration into the European Committee. Without a doubt, having the Spanish representation, with all the experience it can bring, will make our sport grow even more on the European continent.

From the International Padel Federation, we are happy to find that one of the Federations with more history in our sport wants to work and, therefore, go hand in hand with the officiality. A new stage for Padel, where the most important Federations in the World are already part of the European, American, and Asia-Pacific Committees actively cooperating, looking only for **the good of Padel** to achieve the common objectives set.
